

## ***The Wingate Centre***

***Large screen projection with audio,***

***Lighting & games console***

### **Brief**

The Wingate Centre is a registered charity and had fund raised to pay for the build of a new sports hall. As part of the project, they required an entertainment system to include video, audio and lighting.

### **Solution**

We installed a large projection screen (3.5m, suspended on cables) with bright projector. A PA system was installed along with 2 banks of stage lights. Key features included:

- 3m wide screen with bright projector, secured in a protective cage
- Stage lighting with easy to use controls
- PA system with several inputs and high output speakers, microphones etc
- The ability to remove the audio kit when not in use (installed in wheeled flight case)
- A games console (Nintendo Wii)
- TV input in the form of a Freeview system
