

Winsford High Street Primary, Cheshire

Access Control Solution 

complete technology solutions

Brief

To install a good quality and robust access control solution. The school wanted a night camera and audio entry at the main entrance with phones in 5 locations, ranging from the head teacher's office to the staff room and reception.

Solution

We installed a bticino based system with camera and voice capability. With 5 bticino phones connected to the system, access can be granted from all key locations identified on the site survey. Another factor was future expandability. Additional door access points can be added in the future as well as additional phones.
